Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 27 December 2002.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1 and 2 are rejected under 35 U.S.C. 102(e) as being anticipated by Baumann (US Patent # 6,104,922).

Regarding claim 1, Baumann teaches a method of identifying a signal type comprising the steps of: selecting a signal of interest from a displayed spectral waveform for a specified range of frequencies (column 5, lines 29-39); processing data representing the signal of interest to ascertain characteristics of the signal of interest (column 5, lines 35-45); and from the characteristics of the signal of interest determining an identification of the signal type (column 5, lines 54-65).

Regarding claim 2, Baumann teaches the determining step comprises the step of comparing the frequency of the signal of interest with a database of spectral assignments for a plurality of known signals to identify the signal type (column 5, lines 46-65).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Baumann (US Patent # 6,104,922).

Regarding claim 3, Baumann fails to specifically disclose the processing step comprises the step of estimating from the data an occupied bandwidth for the signal of interest as one of the characteristics for input to the determining step. However, since Baumann does disclose a processing step comprising estimating different characteristics for the signal of interest in order to have an input for the determining step (column 6, lines 58-66) and estimating an occupied bandwidth for a signal is very well known in the art, one of ordinary skill in the art at the time the invention was made would have looked to add bandwidth estimation to Baumann's invention in order to allow for more accurate measurements and better authentication means.

Allowable Subject Matter

Regarding claims 4-6; please see reasons for allowance in office action # 2, dated 10/3/02.

Response to Arguments

Applicant's arguments with respect to claims 4-6 have been considered but are moot in view of the new ground(s) of rejection.
